"Atypical sex behavior is also rare. I heard of no cases of rape, i.e., of intercourse with a girl who had not yet undergone the rites of puberty. When a man uses a certain amount of [189] force in seducing a potential spouse who has passed through the rites of puberty, this is not regarded as rape."

(1941-42) 1946

Siriono

"Masturbation is likewise not a common juvenile pastime, and I never heard of it being practiced by adults. Children, especially boys, however, finger their genitals a great deal without censure, and when they are young their parents masturbate them frequently. Among the men the pattern of fingering the penis, especially tugging on the foreskin, carries on into adult life. Since it occurs most frequently when they are standing around, it is probably an automatic reaction to anxiety; when a Siriono is worried, he usually has hold of his penis."

2: Holmberg--189-190 (1941-42) 1946 Siriono
116, 158, 839

"Only one other case of sexual perversion came to my attention, and this was of a man calle Etómi (Lazy). Besides being what his name suggests, Etómi had, according to the women, a sadistic mania for wounding them on the breasts during sexual intercourse. Consequently they would have nothing to do with him. He had no wife and was most uncommunicative. His favorite pastime--the reason for his nickname-- was resting, which he managed to do a great deal of by the following [190] ingenious device. He was an expert at tracking tortoises. He would gather as many as ten of them at a time and hang them up alive on a beam in the house. He would then butcher one or two each day, meanwhile resting in his hammock, until the supply was gone. He spent long periods of time alone in the forest, and was one of the few Siriono out of whom I could worm no information whatsoever."
